INDEX TO THE ADVANCEMENT OF SCIENCE

Volume 26, Nos. 127–130, September 1969–June 1970

Agriculture, a strategy for, Sir Joseph Hutchinson **128**, 180

BARR, F. (Ed.) Developments in the in-service training of teachers **129**, 260
BARRY, PROF. B. Recent developments in the study of political choice **130**, 394
BARTON, PROF. D. H. R. Whither organic chemistry? **127**, 19
BELL, PROF. G. H. Living bone as an engineering material **127**, 75
BIGGS, EDITH. The impact of metrication on the education service **129**, 234
Biological control, the nature and advantages of, F. Wilson **130**, 374
BOOKS:
Exeter and its region, **127**, 52
for the general reader/new books (National Book League Notes), **127**, 58, **128**, 219, **129**, 334, **130**, 451
metrication, **129**, 240
reviews, **127**, 54, **128**, 215, **129**, 329, **130**, 445
Botany in the United Kingdom, Sir Frank Engledow **130**, 408
Botany today, the state of, P. W. Brian **128**, 172
BRIAN, PROF. P. W. The state of botany today **128**, 172
BROAD, S. T. The educational aspects of nature and conservation **127**, 91
Buried soils, G. W. Dimbleby and M. C. D. Speight **128**, 203

CAIRNCROSS, SIR ALEXANDER Control of the economy—what does it take? **130**, 337
CAIRNCROSS, SIR ALEXANDER The managed economy **127**, 64
CALDER, LORD RITCHIE- Metrication **129**, 225
Cartography today, R. C. A. Edge **130**, 355
CHAMPNESS, B. G. Mutual glance and the significance of the look **129**, 309
Chemical control, the nature and implications of, K. Mellanby **130**, 372
CHILDS, DR. A. F. The value of a Ph.D. 'when doctors disagree' **129**, 245
CLARKE, PROF. A. D. B. Problems in assessing the later effects of early experience **130**, 379
CLIFFORD, W. K., Exeter's mathematician, E. A. Power **129**, 318
Control of the economy–what does it take? Sir Alexander Cairncross **130**, 337

DEACON, DR. G. E. R. Exploiting the oceans **129**, 313
Decimalization and metrication, **129**, 240
DIMBLEBY, PROF. G. W. and SPEIGHT, DR M. C. D. Buried soils **128**, 203
DITCHBURN, PROF. R. W. Sight and survival **127**, 10

Economy, the managed, Sir Alexander Cairncross **127**, 64
EDGE, MAJOR-GENERAL R. C. A. (Ed.) Cartography today **130**, 355
EDGE, MAJOR-GENERAL R. C. A. The changing tasks and methods of the surveyor **127**, 43
Education service, the impact of metrication on the, Edith Biggs **129**, 234
ENGLEDOW, SIR FRANK Botany in the United Kingdom **130**, 408
Entrepeneur, the scientific, G. Scott **129**, 256
Exeter and its region, recent books on the history and topography of, **127**, 52

FEILDEN, G. B. R. Metrication—the national and international bonus **129**, 227
FINNISTON, DR. H. M. Future imperfect **128**, 133
FULLER, DR. WATSON Molecular structure and biological function **129**, 267
Future imperfect, H. M. Finniston **128**, 133

Geographical environment of the future, the, M. J. Wise **130**, 429
Geology in schools and universities, J. F. Kirkaldy **127**, 25
GOLDTHORPE, J. H. Social inequality and social integration in modern Britain **128**, 190

HASLETT, A. W. Little science versus big science **127**, 99
HEWER, PROF. H. R. The importance of being a zoologist **127**, 34
HICKMAN, DR. J. Some surface chemical aspects of lubrication **130**, 438
HOGGARTH, DR. E. The industrial point of view **129**, 251
HUGHES, A. M. Looking at science **127**, 61, **128**, 222
HUGHES, A. M. Some visual aids on metrication **129**, 243
HUTCHINSON, PROF. SIR JOSEPH A strategy for agriculture **128**, 180

Industrial point of view, the, E. Hoggarth **129**, 251
Inferences about personal characteristics, P. B. Warr **128**, 206
In-service training of teachers, developments in the, F. Barr **129**, 260
Invention and innovation—the motor with the hole, P. J. Lawrenson **128**, 120
Inventiveness and innovation in industry, I. Maddock (Chairman) **128**, 107

KENYON, DR. K. M. The origins of the Neolithic **128**, 144
KIRKALDY, PROF. J. F. Geology in schools and universities **127**, 25

Land in Britain, the competitive demands for, G. Wibberley **130**, 422
Lasers—present achievements and applications, R. C. Smith **130**, 346
LAWRENSON, PROF. P. J. The motor with the hole—invention and innovation **128**, 120

LINNETT, PROF. J. W. The educational importance of the existing Ph.D. **129**, 254
Little science versus big science, A. W. Haslett **127**, 99
Livestock in developing economies, the role of, Lucia S. Pearson **129**, 289
Living bone as an engineering material, G. H. Bell **127**, 75
Local elections, alternative approaches to the study of: social and rational models of man, J. Stanyer **130**, 399
Looking at science, A. M. Hughes **127**, 61, **128**, 222
Lubrication, some surface chemical aspects of, J. Hickman and K. Middleton **130**, 438

Management and control in East European economies, A. Nove **129**, 298
Management of the national environment **130**, 422
MEDAWAR, SIR PETER. On 'The effecting of all things possible' **127**, 1
MELLANBY, DR. K. The nature and implications of chemical control **130**, 372
Metrication, Lord Ritchie-Calder of Balmashannar **129**, 225
Metrication, some visual aids on, A. M. Hughes **129**, 243
Metrication—the national and international bonus, G. B. R. Feilden **129**, 227
MIDDLETON, K. Some surface chemical aspects of lubrication **130**, 438
Molecular structure and biological function, Watson Fuller **129**, 267
Motion sickness: a special case of sensory rearrangement, J. T. Reason **130**, 386
Mutual glance and the significance of the look, B. G. Champness **129**, 309

Nature and conservation, the educational aspects of, S. T. Broad **127**, 91
Neolithic, the origins of the, K. M. Kenyon **128**, 144
NOVE, PROF. A. Management and control in East European economies **129**, 298

Oceans, exploiting the, G. E. R. Deacon **129**, 313
On 'The effecting of all things possible', Sir Peter Medawar **127**, 1

Parasites and pests, the control of **130**, 372
PEARSON, DR. LUCIA S. The role of livestock in developing economies **129**, 289
PENISTAN, M. J. A silviculturist in wonderland **127**, 86
Personality assessment: prediction or description? B. Semeonoff **128**, 161
Ph.D., the educational importance of the existing, J. W. Linnett **129**, 254
Political choice, recent developments in the study of, B. Barry **130**, 394
POWER, PROF. E. A. Exeter's mathematician—W. K. Clifford **129**, 318
Problems in assessing the later effects of early experience, A. D. B. Clarke **130**, 379

REASON, DR. J. T. Motion sickness: a special case of sensory rearrangement **130**, 386
RITCHIE-CALDER, LORD, Metrication **129**, 225

SCOTT, PROF. G. The scientific entrepreneur **129**, 256
SEMEONOFF, DR. BORIS Personality assessment: prediction or description? **128**, 161
Sight and survival, R. W. Ditchburn **127**, 10
Silviculturist in wonderland, a, M. J. Penistan **127**, 86
SMITH, DR. R. C. Lasers—present achievements and applications **130**, 346
Social inequality and social integration in modern Britain, J. H. Goldthorpe **128**, 190
Sociological study of political choice, the **130**, 394
SPEIGHT, DR. M. C. D. and DIMBLEBY, PROF. G. W. Buried soils **128**, 203
STANYER, J. Social and rational models of man: alternative approaches to the study of local elections **130**, 399
Surveyor, the changing tasks and methods of the, R. C. A. Edge **127**, 43

Value of a Ph.D. 'when doctors disagree,' the A. F. Childs **129**, 245

WARR, DR. P. B. Inferences about personal characteristics **128**, 206
What's the use of a Ph.D.? **129**, 245
Whither organic chemistry? D. H. R. Barton **127**, 19
WIBBERLEY, PROF. G. P. The competitive demands for land today **130**, 422
WILSON, F. The nature and advantages of biological control **130**, 374
WISE, PROF. M. J. The geographical environment of the future **130**, 429

YOUINGS, JOYCE Recent books on the history and topography of Exeter and its region **127**, 52

Zoologist, the importance of being a, H. R. Hewer **127**, 34
